ST. MARY'S HOSPITAL  
1913-1914

HAYES AND STANYAN STREETS  
SAN FRANCISCO  
CALIFORNIA

“Blessed are the merciful;  
for they shall obtain mercy.”

San Francisco, 1915

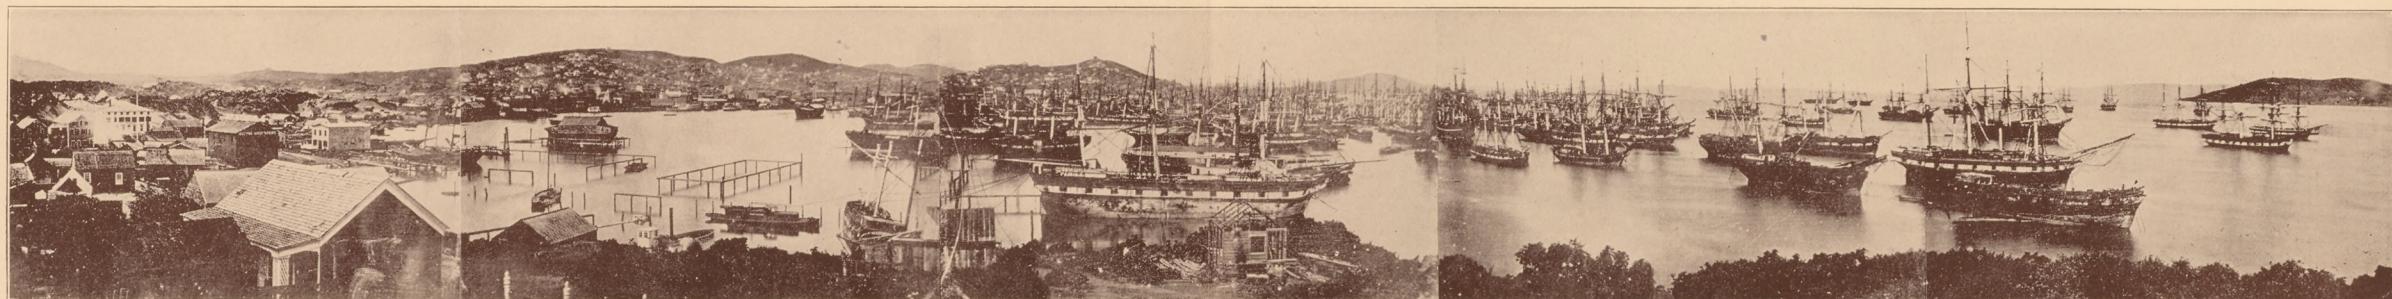

## HISTORICAL SKETCH OF ST. MARY'S HOSPITAL

The history of St. Mary's Hospital runs parallel with that of San Francisco. The first Sisters of Mercy landed in our city on December 8, 1854, and before they were settled in their new home an epidemic of cholera broke out. The Sisters, who had been in cholera hospitals, and who were familiar with all the phases of the disease and its remedies, immediately devoted all their time and energy to the care of the stricken ones, particularly of those in the County Hospital. So thoroughly were their services appreciated, that at the subsidence of the epidemic the Sisters were requested to take charge of the institution. They assumed the responsibility on October 24, 1855, and continued in charge until they bought the premises, and in July, 1857, they opened the original St. Mary's Hospital in the old County Hospital building on Stockton Street. ♦

Keeping pace with our growing city, advancing daily from North Beach to South Park, St. Mary's soon occupied a magnificent brick structure on Rincon Hill, then the most aristocratic residence section of the city. The corner-stone of the new building was laid by Archbishop Alemany on September 3, 1860, Reverend Daniel Slattery being the orator on the occasion. In November, 1861, the Sisters of Mercy took possession of their new hospital, having on the opening day twenty-seven patients. ♦ For forty-five years St. Mary's continued to prosper, ministering daily to the sick and afflicted, not only to those within its walls, but also to thousands in their own homes, in city and state institutions, and particularly to the victims of the dreaded smallpox during two epidemics. From time to time additions were built, and improvements were in-

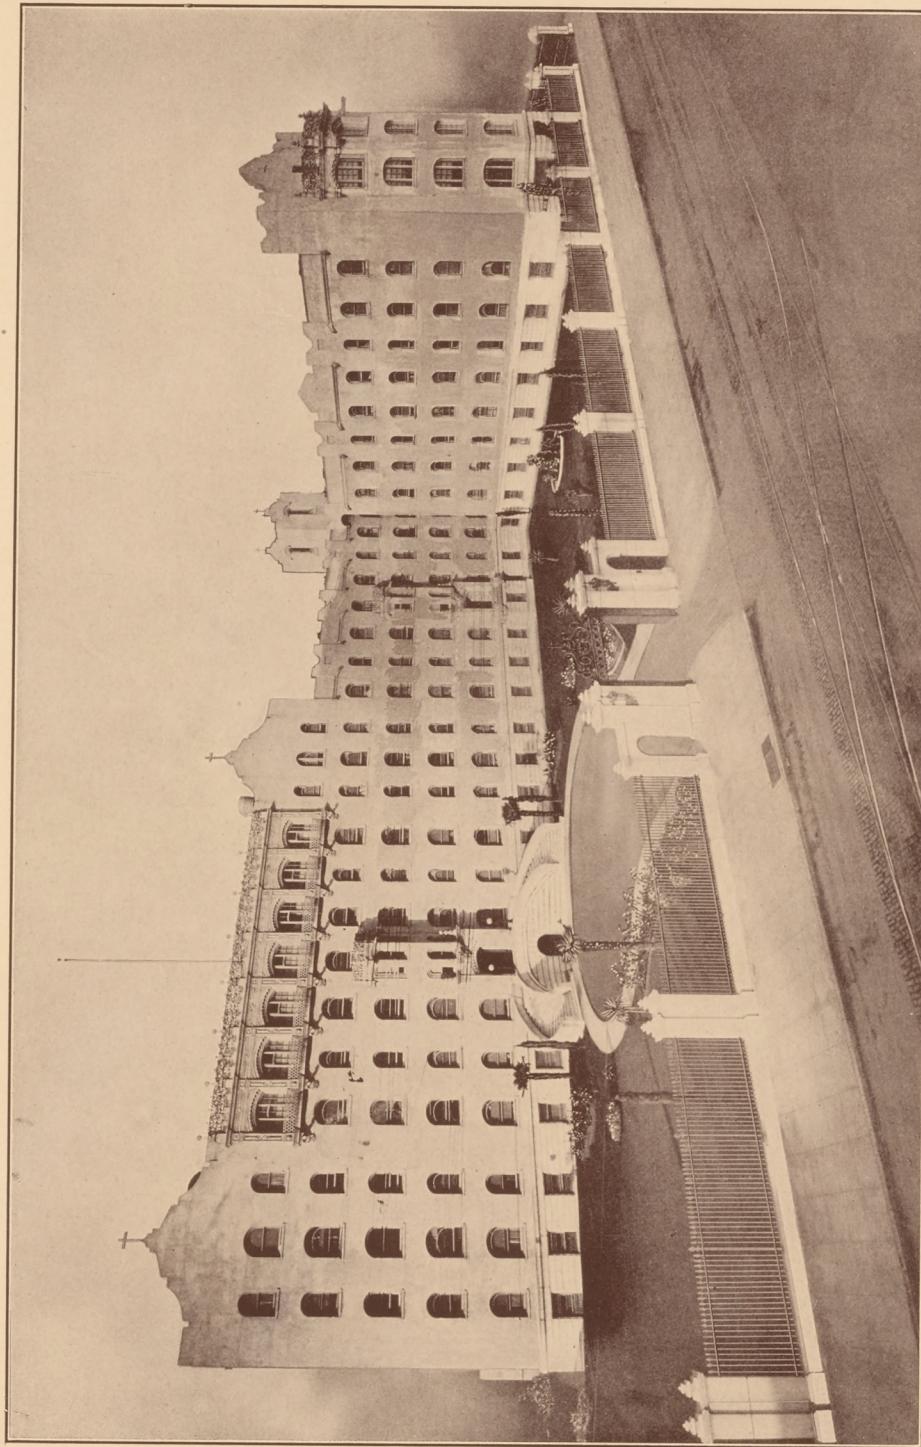

roduced, that St. Mary's might hold the highest place among institutions of its kind. ♦ Although the hospital building withstood the great earthquake of April 18, 1906, suffering not even the loosening of a brick or the breaking of a glass, yet, true to the history of San Francisco, it lay, before midnight, a blackened mass of ashes and brick. On account of its proximity to the water, the Sisters had, during the day, removed the patients and other inmates to the Steamer Modoc, not that they apprehended any danger from fire, but because they feared the great heat from the burning city. This precautionary measure proved providential, as they were able to locate all who had left St. Mary's in comfortable quarters on the opposite side of San Francisco Bay. ♦ Not wishing to lose time when their services were sadly needed, eight

of the Sisters of Mercy returned to San Francisco within a few days and opened a tent hospital, the third St. Mary's, on the lot bounded by Hayes, Stanyan, Grove and Shrader streets, which lot they had purchased for a hospital site. There they labored until June 17th of the same year, when they took possession of the building at 2344 Sutter Street, which, after a great amount of repairing, they had prepared for the reception of the patients. ♦ In February, 1911, St. Mary's Hospital welcomed its countless friends to its new home on Hayes Street, just at the entrance to Golden Gate Park. In its design, the Sisters of Mercy have left nothing undone to erect a hospital building that will not only maintain in every way the high standing of the institution, but which will be an ornament to San Francisco.

San Francisco, 1854

ST. MARY'S HOSPITAL

REPORT  
OF  
ST. MARY'S HOSPITAL  
SAN FRANCISCO  
(FOUNDED 1857)

CONDUCTED BY  
SISTERS OF MERCY

FROM JANUARY 1, 1913  
TO DECEMBER 31, 1914

## DESCRIPTIVE SKETCH OF THE HOSPITAL

**T**HE completed portion of the contemplated structure consists of the central section and the east wing. The framework is of steel, with reinforced concrete filling, the entire building being, as far as possible, proof against earthquake or fire. The main corridor on each floor measures 256 feet, and that of the wing 147 feet.

As the building faces the south, the rooms and wards are flooded with sunlight, the northern portion being reserved for service rooms. On each floor are large circular sun-rooms, comfortably furnished, for the convalescent. A most attractive feature is the roof-garden extending over the entire building, and reached by an elevator large enough to carry a patient, even in his bed.

In the rear of the main structure and attached to it is a two-story building of solid reinforced concrete. The upper floor consists of main kitchen, diet kitchen, tray-room, dining-room for the domestics, store-rooms, etc. From this department the trays are sent to the various parts of the building in electrically heated food-carriers especially designed for the new St. Mary's.

## ANNOUNCEMENT

**T**HE BIENNIAL REPORT of St. Mary's Hospital for the years 1913-1914 marks the fifty-eighth year of its existence. Though changing its location four times, it has, notwithstanding the vicissitudes of half a century, been constantly increasing its field of labor, and has ever been on the alert to meet the increased demands made upon it with the advance of science.

We take this opportunity of extending our sincere thanks to the members of our Hospital Staff, and of expressing our appreciation of their ability, careful attention, courtesy, and unfailing cooperation, which have made possible the success of the year now closing.

We wish to acknowledge our debt of gratitude to the many physicians and surgeons of the city who have kindly given us their patronage, as well as to the hosts of friends who have proved their interest in St. Mary's Hospital by giving it their substantial support.

As the policy by which we are governed in affairs wherein practicing physicians and ourselves are mutually interested will still be maintained, we here outline it.

Recognizing the fact that the business interests of the physician and of our institution are parallel, there is every reason why business policy should dictate that we safeguard the interests of the physician in every possible way. We believe that this object is fully accomplished in the manner of conducting our institution. We have refrained from establishing a hospital society, as we are confident that the business arrange-

ments involved therein encroach upon a field legitimately belonging to the physician. We are also certain that arrangements wherein medical services are furnished by the hospital, gratis, or nearly so (provided the patient meets the usual hospital rate for room or ward), must assuredly mean that this medical service is furnished at a loss to physicians at large. It would appear that from this system great benefit would accrue to institutions and hospitals at the expense of the medical profession. This difficulty, we feel, is fully obviated in our case, since we confine our work entirely to the care of the sick.

The patient coming to us for treatment is obligated to us solely for the care which we furnish. He is likewise obligated to the physician for his services. That these obligations are separate and distinct is evident even to the patient. We endeavor to provide that the physician shall have control over his patient similar to that which he would exercise were he treating the patient at his home, and we do not in any way participate in the business arrangements between them.

## HOSPITAL STAFF

SURGEON AND GYNECOLOGIST  
T. E. BAILLY, Ph. D., F. A. C. S., M. D.

SURGEON  
THEODORE RETHERS, F. A. C. S., M. D.  
(Berlin, Germany)

GENITO-URINARY SURGEON  
C. D. MCGETTIGAN, A. M., M. D.

PEDIATRICIAN  
C. C. MOHUN, A. M., M. D.

NEUROLOGISTS  
L. NEWMARK, M. D. M. B. LENNON, A. M., M. D.

DERMATOLOGIST  
HOWARD MORROW, M. D.

SPECIALISTS  
(Eye, Ear, Nose and Throat)  
JOHN R. McMURDO, A. M., Ph. G., M. D.  
JAMES FRANKLIN SMITH, M. Sc., M. D. F. J. S. CONLAN, M. D.  
L. A. SMITH, M. D.

OBSTETRICIAN  
E. TOPHAM, M. D.

### ASSOCIATE PHYSICIANS

JOS. W. HENRY, M. D.	W. C. HOPPER, M. D.
V. C. DERHAM, M. D.	J. HADERLE, M. D.
H. V. HOFFMAN, M. D.	J. N. TAVLOPOULOS, M. D.

ASSOCIATE SURGEON  
GUIDO E. CAGLIERI, B. Sc., F. R. C. S., M. D.

PATHOLOGIST  
H. R. OLIVER, M. D.

ROENTGENOLOGIST  
G. L. PAINTER, Ph. G., M. D.

SURGEON DENTIST  
THOS. H. MORRIS, D. D. S.

ANESTHETIST  
MISS KATHERINE KEENAN, R. N.

RESIDENT PHYSICIAN  
ROSS W. HARBAUGH, M. D.

INTERNES  
H. W. HARDING, M. D. W. F. KITTLE, M. D.

## RULES AND REGULATIONS

**V**ISITING hours are from 2 to 4 and from 7 to 8:30 p. m. Out of consideration for the patient, visits should not be prolonged. All visitors are expected to leave the hospital not later than 8:45 p. m., at which time the lights are lowered.

By applying at the office, relatives may obtain permission to remain with patients who will probably not live until morning.

Patients are not permitted to receive food of any kind from an outside source without the knowledge and consent of the Sister in charge.

Smoking is strictly prohibited throughout the building.

Upon entering the hospital, patients are requested to leave in the office any money or article of value they may have with them. These will be placed in the safe, and a receipt for them will be given. Unless this regulation is observed, the hospital will not be accountable for any loss that may occur.

Patients wishing to leave the hospital, even for a short time, are requested to ask permission from the Sister in charge of the floor.

## RATES

The regular hospital rates include room, board, ordinary medicines and general nursing. They have no connection with the fee for services rendered by an attending physician or surgeon.

An extra charge is made for dressings, for unusual, expensive or proprietary medicine, for stimulants or mineral waters taken in large quantities, and also for special work done in the X-ray, Hydrotherapeutic and Pathological departments.

All bills are paid weekly and invariably in advance.

Suite, Per Week						\$75.00
<b>PRIVATE ROOMS:</b>						
Per Week	\$27.00	\$32.00	\$35.00	\$40.00	\$50.00	
Per Day (less than week)	4.00	5.00	5.50	6.50	7.50	
Per Day (single day only)	5.00	5.50	6.00	7.00	9.00	
<b>HALF ROOMS:</b>						
Per Week				\$20.00	\$22.00	
Per Day (less than week)				3.00	3.50	
Per Day (single day only)				3.25	3.75	
<b>WARDS:</b>						
	Ordinary Patients	Typhoid Patients		Paralyzed and Alcoholic Patients		
Per Week	\$14.00	\$17.00		\$20.00		
Per Day (less than week)	2.25	2.50		3.00		
Per Day (single day only)	2.50	3.00		3.50		
Bath Service (private)			\$10.00 extra			
Private Rooms for typhoid patients				5.00 extra		

## RATES—Continued

Confinement cases treated in private rooms only at \$32.00 per week, with an additional charge of \$10.00 for maternity services.

### ANAESTHETIC

Use of operating room, including anaesthetist, minor	\$10.00
major	\$15.00
Anaesthetic with use of operating room for major operations after 6 p. m.	20.00
Anaesthetic with use of operating room for minor operations after 6 p. m.	15.00
Gas and oxygen anaesthetic, extra charge according to the amount consumed.	
Dressing-room Services for Cystoscopy, etc.	5.00
Anaesthetic and use of operating room for teeth extraction (with the privilege of resting for a few hours)	5.00

## SCHEDULE OF FEES FOR NURSES

### ORDINARY CASES:

Female Nurses: \$25.00 per week or \$4.00 per day for a broken week for either male or female nurses. Same rate when two nurses are on a case.

Male Nurses: \$35.00 per week or \$5.00 per day.

### MATERNITY CASES:

\$30.00 per week when one nurse is on the case.

\$25.00 per week each when two nurses are on the case.

### DRUG ADDICTION AND NERVOUS CASES:

Female Nurses: \$30.00 per week when one nurse is on the case. \$25.00 per week each when two nurses are on the case.

Male Nurses: \$6.00 per day when one nurse is on the case. \$5.00 per day each when two nurses are on the case. (In special cases the nurse, by arrangement with the doctor or patient, may charge more.)

Graduate Nurse's board, \$7.00 per week. Should two graduate nurses be employed on a case, \$9.50 per week.

Extra trays will not be served except for sufficient reason, and will be an extra charge of 50c each.

The telephones on the floors are for the use of the doctors and the nurses in charge of their cases. There is a public phone on the second floor. Private phones can be installed in most of the private rooms, if desired by the patients, at a charge of 50c for a month or less and 5c per switch.

MAIN OFFICE

## PATHOLOGICAL DEPARTMENT

THE laboratory is one of the largest and best appointed of its kind. The room measures 32 by 18 feet, has tiled floor, and white enamel woodwork. Along both ends of the room are large cases used for the storage of pathological material, and laboratory reagents and supplies. In the center stands a large laboratory table, zinc covered, containing drawers and lockers. There are also working tables for four pathologists.

The department contains a complete outfit of apparatus for chemical, bacteriological and pathological examinations, such as incubators, sterilizers, hot-air ovens, auto-claves, centrifugalizers, balances and microscopes.

The pathological specimens are preserved in color, placed in glass jars, and properly labeled, after which they are indexed in the laboratory catalogue. All specimens received are similarly classified, copies of all reports being kept on file.

A well-equipped morgue, with adjoining autopsy rooms, is at the service of all visiting physicians, under the supervision of the pathologist.

The staff is comprised of the director and three internes, each of the latter attending to the work involved in his allotment of cases. Special examinations are made by the director, while all the work is under his supervision.

### CHARGES FOR LABORATORY WORK

Moro Test	.....	\$ 0.50
Von Pirquet	.....	.50
Calmette Test	.....	1.00
Tuberculin Test	.....	2.50
Widal (as many as necessary)	.....	5.00
Culture, Blood	.....	10.00
Culture, Bacteriological Examinations	.....	5.00
Fluid, Cystic	.....	2.50
Fluid, Spinal	.....	5.00
Tubercle Bacilli	.....	2.50
Plasmodia, Malaria	.....	2.50
Blood Count, Ordinary	Hemoglobin and White, no charge	
Blood Count, Complete	.....	2.50
Urinalysis, Ordinary	.....	no charge
Urinalysis, Quantitative	.....	2.50
Tissues, Histological	.....	10.00
Smears, Microscopic	.....	2.50
Feces, Microscopic for Parasite and Occult Blood	.....	5.00
Inoculation, Guinea Pigs	.....	10.00
Milk	.....	2.50
Gastric Contents	.....	5.00
Autopsy	.....	no charge
Wasserman Reaction, for diagnosis	.....	5.00
Wasserman Reaction, when repeated in treatment, per test	.....	5.00
Autogenous Vaccines	.....	15.00

### PATHOLOGICAL REPORT

Blood Counts . . . . .	2,890	Sputum . . . . .	420
Blood Cultures . . . . .	14	Spinal Fluids . . . . .	16
Catgut Tests . . . . .	6	Stomach Contents . . . . .	191
Cultures . . . . .	122	Tissues, Histological . . . . .	175
Feces . . . . .	220	Urine Examinations . . . . .	13,860
Malaria . . . . .	178	Wasserman Reactions . . . . .	86
Milk . . . . .	8	Widal . . . . .	103
Pleural Fluids . . . . .	16	Guinea Pig Inoculations . . . . .	23
Smears . . . . .	100		

### X-RAY DEPARTMENT

**O**UR X-Ray Department is under the supervision of Dr. George L. Painter, on whose recommendation it has been equipped with up-to-date apparatus. The department is thus prepared to do all kinds of radiologic work, both therapeutic and radiographic, special accessories being provided for instantaneous and stereoscopic exposures of all parts of the body, when this work is desired.

#### CHARGES FOR X-RAY DEPARTMENT

X-ray charges depend on the number of views. The following are the approximate prices, which may vary somewhat when class of work is requested:

2 Views of hand, wrist, teeth or foot . . . . .	\$10.00
1 View jaw . . . . .	10.00
2 Views forearm, elbow, arm, ankle or leg . . . . .	12.50
2 Views knee or neck . . . . .	15.00
1 View shoulder, hip, lumbar spine or apices . . . . .	15.00
1 View chest, pelvis or head . . . . .	20.00

Digestive or urinary tract depending upon number of plates wanted.

These rates apply to ordinary cases, but for special work additional charges may be made.

#### X-RAY REPORT

Abdomen . . . . .	10	Intestinal . . . . .	22
Ankle . . . . .	78	Jaw . . . . .	3
Arm . . . . .	12	Knee . . . . .	49
Chest . . . . .	29	Leg . . . . .	80
Clavicle . . . . .	4	Neck . . . . .	14
Elbow . . . . .	14	Pelvis . . . . .	5
Eye (location of foreign body) . . . . .	2	Shoulder . . . . .	26
Foot . . . . .	25	Spine . . . . .	27
Forearm . . . . .	25	Stomach . . . . .	148
Hand . . . . .	5	Thigh . . . . .	28
Head . . . . .	15	Urinary Tract . . . . .	58
Hip . . . . .	38	Wrist . . . . .	29
Total . . . . .			746

## HYDROTHERAPEUTIC DEPARTMENT

THE Hydrotherapeutic Department is most modern and complete. Inasmuch as it is conducted by operators who have studied the various treatments both in this country and in Europe, the best of service is rendered.

### CHARGES FOR HYDROTHERAPEUTIC DEPARTMENT

Nauheim Bath	.....	\$3.00
Needle Bath	.....	1.00
Shower Bath	.....	1.00
Tub Bath (medical)	.....	1.50
Sitz Bath	.....	1.00
Hot Air Cabinet Bath	.....	1.50
Electric Light Cabinet Bath	.....	1.50
Turkish Bath	.....	1.50
Continuous Bath	(length of time regulates charge)	
Scott's Douche	.....	1.00
Alternating Douche	.....	1.00
Salt Glow	.....	1.50
General Massage	.....	2.00
Local Massage	.....	1.00
Massage with other treatment extra	.....	1.00
Baking, local	.....	1.50
Baking, over whole body	.....	2.50

## COURSE OF STUDY

### FIRST YEAR

#### INSTRUCTION BY SUPERINTENDENT OF NURSES

- Ethics of Nursing.
- Bed-making: changing: lifting: moving.
- Hygiene of sick-room and ward: Ventilation, etc.
- Baths—for cleanliness: as therapeutic agents: hot and cold pack.
- Prevention and treatment of bed-sores.
- Bacteriological notes: Disinfectants.
- Enemata.
- Douches: catheterization: bladder-washing.
- Temperature: pulse: respiration: charting.
- Counter-irritants: external and local applications: dry and moist heat.
- Medicines: dosage: weights and measures.
- Anatomy and Physiology: the tissues: skeleton: muscles: vascular system.

#### DIETETICS

- General food principles: relative food value: chemical composition: methods of cooking.
- Six lectures and twelve weeks' practice in the preparation of full, light and special diets.

#### LECTURES BY MEMBERS OF HOSPITAL STAFF

- Anatomy and Physiology—15 lectures.
- Chemistry—8 lectures.
- Bacteriology—8 lectures.

### SECOND YEAR

#### INSTRUCTION BY SUPERINTENDENT OF NURSES

- Ethics of Nursing.
- Observation and recording of symptoms.
- Preparation for examination and operation.
- Post-operative care.
- Anatomy of respiratory system.

#### LECTURES BY MEMBERS OF HOSPITAL STAFF

- Bandaging—8 practical demonstrations.
- Materia Medica—10 lectures.
- Surgery—7 lectures.
- Medical Diseases: Children's Diseases: Contagious Diseases—8 lectures.
- Anatomy and Diseases of Eye, Ear, Nose and Throat—8 lectures.
- Obstetrics: Anatomy of Pelvis—12 lectures.

## COURSE OF STUDY—Continued

### THIRD YEAR

#### INSTRUCTION BY SUPERINTENDENT OF NURSES

Ethics of Nursing.

Nursing in diseases of the special senses.

Nursing in nervous diseases.

#### LECTURES BY MEMBERS OF HOSPITAL STAFF

Anatomy of Kidney and Urinalysis—5 lectures with practical demonstrations.

Gynecology and Operating-room Technique—14 lectures.

Massage—10 practical demonstrations.

## ACKNOWLEDGMENTS

THE Sisters acknowledge, with gratitude, the kindness of the Staff Doctors who have gratuitously given their services to the members of the community and of the Nurses' Training School, as well as to the poor patients in the hospital.

We take this opportunity of thanking our many kind patrons and friends for donations in cash, fruits, flowers, magazines and books.

On Monday evening, October 4, 1914, the graduates and the pupils of St. Mary's Training School for Nurses were the guests of the Sisters of Mercy at a delightful party given in the beautiful roof-garden of the hospital. The many-colored electric lights reflected in the fountains, together with the waving palms, flowering shrubs and other growing plants, all under the starry canopy, formed a scene like fairyland. The music for the dancing was kindly furnished by Misses Nellie and Agnes Butler and Master William Butler, pupils of St. Peter's Academy.

Through the kindness of Dr. John McMurdo the nurses and many of the patients enjoyed a musical treat, during which the best productions of the world-famous musicians, both vocal and instrumental, were reproduced on a Victrola of exceptional value.

All of the inmates of the hospital who were able to spend a few hours in the Nurses' Lecture Hall enjoyed a rare treat through the kindness of Dr. Alexander S. Keenan, who introduced to them Mr. Jean Toner, a pianist of the highest rank. Mr. Toner entertained a most appreciative audience, charming all with his rendition of classical compositions.

## ENDOWMENTS

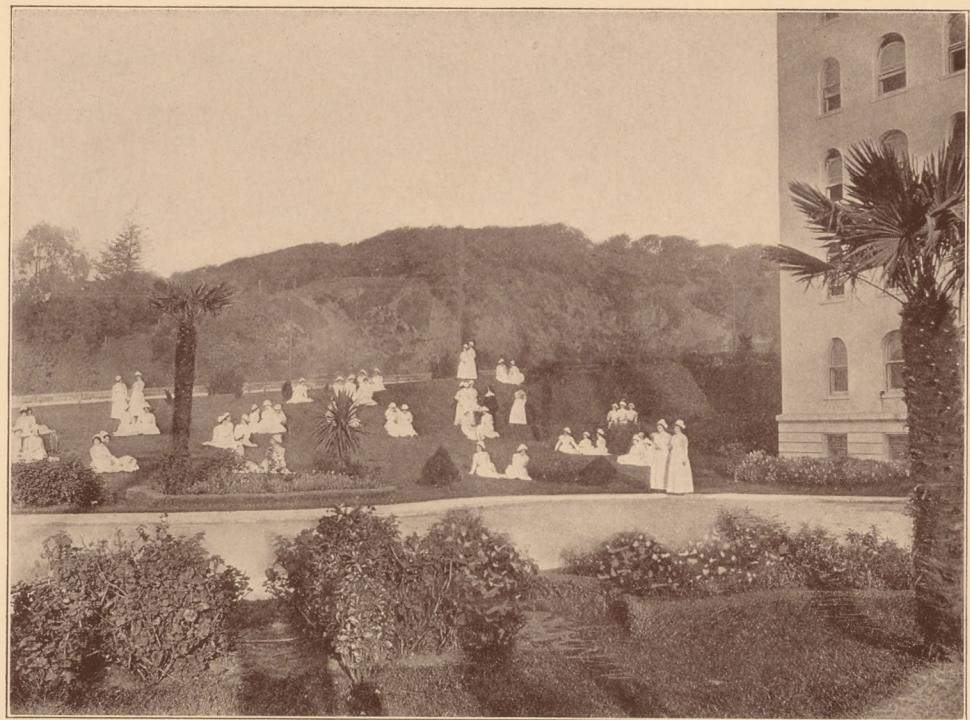

The hospital has six endowed beds for the exclusive use of the sick poor:

The Justinian Caire Bed, endowed in memory of the late Justinian Caire by his widow.

Four Giblin Beds, endowed in memory of the late Thomas Giblin by his widow.

The Youths' Directory Bed, endowed by Reverend D. O. Crowley for the boys of the Youths' Directory.

Besides the patients treated in the endowed beds during the past two years—69 patients received, gratuitously, 276 weeks treatment—reduced rates were given to 381 patients for an aggregate of 1053 weeks.

IN MEMORY OF THE MOST REVEREND  
PATRICK WILLIAM RIORDAN, D. D.

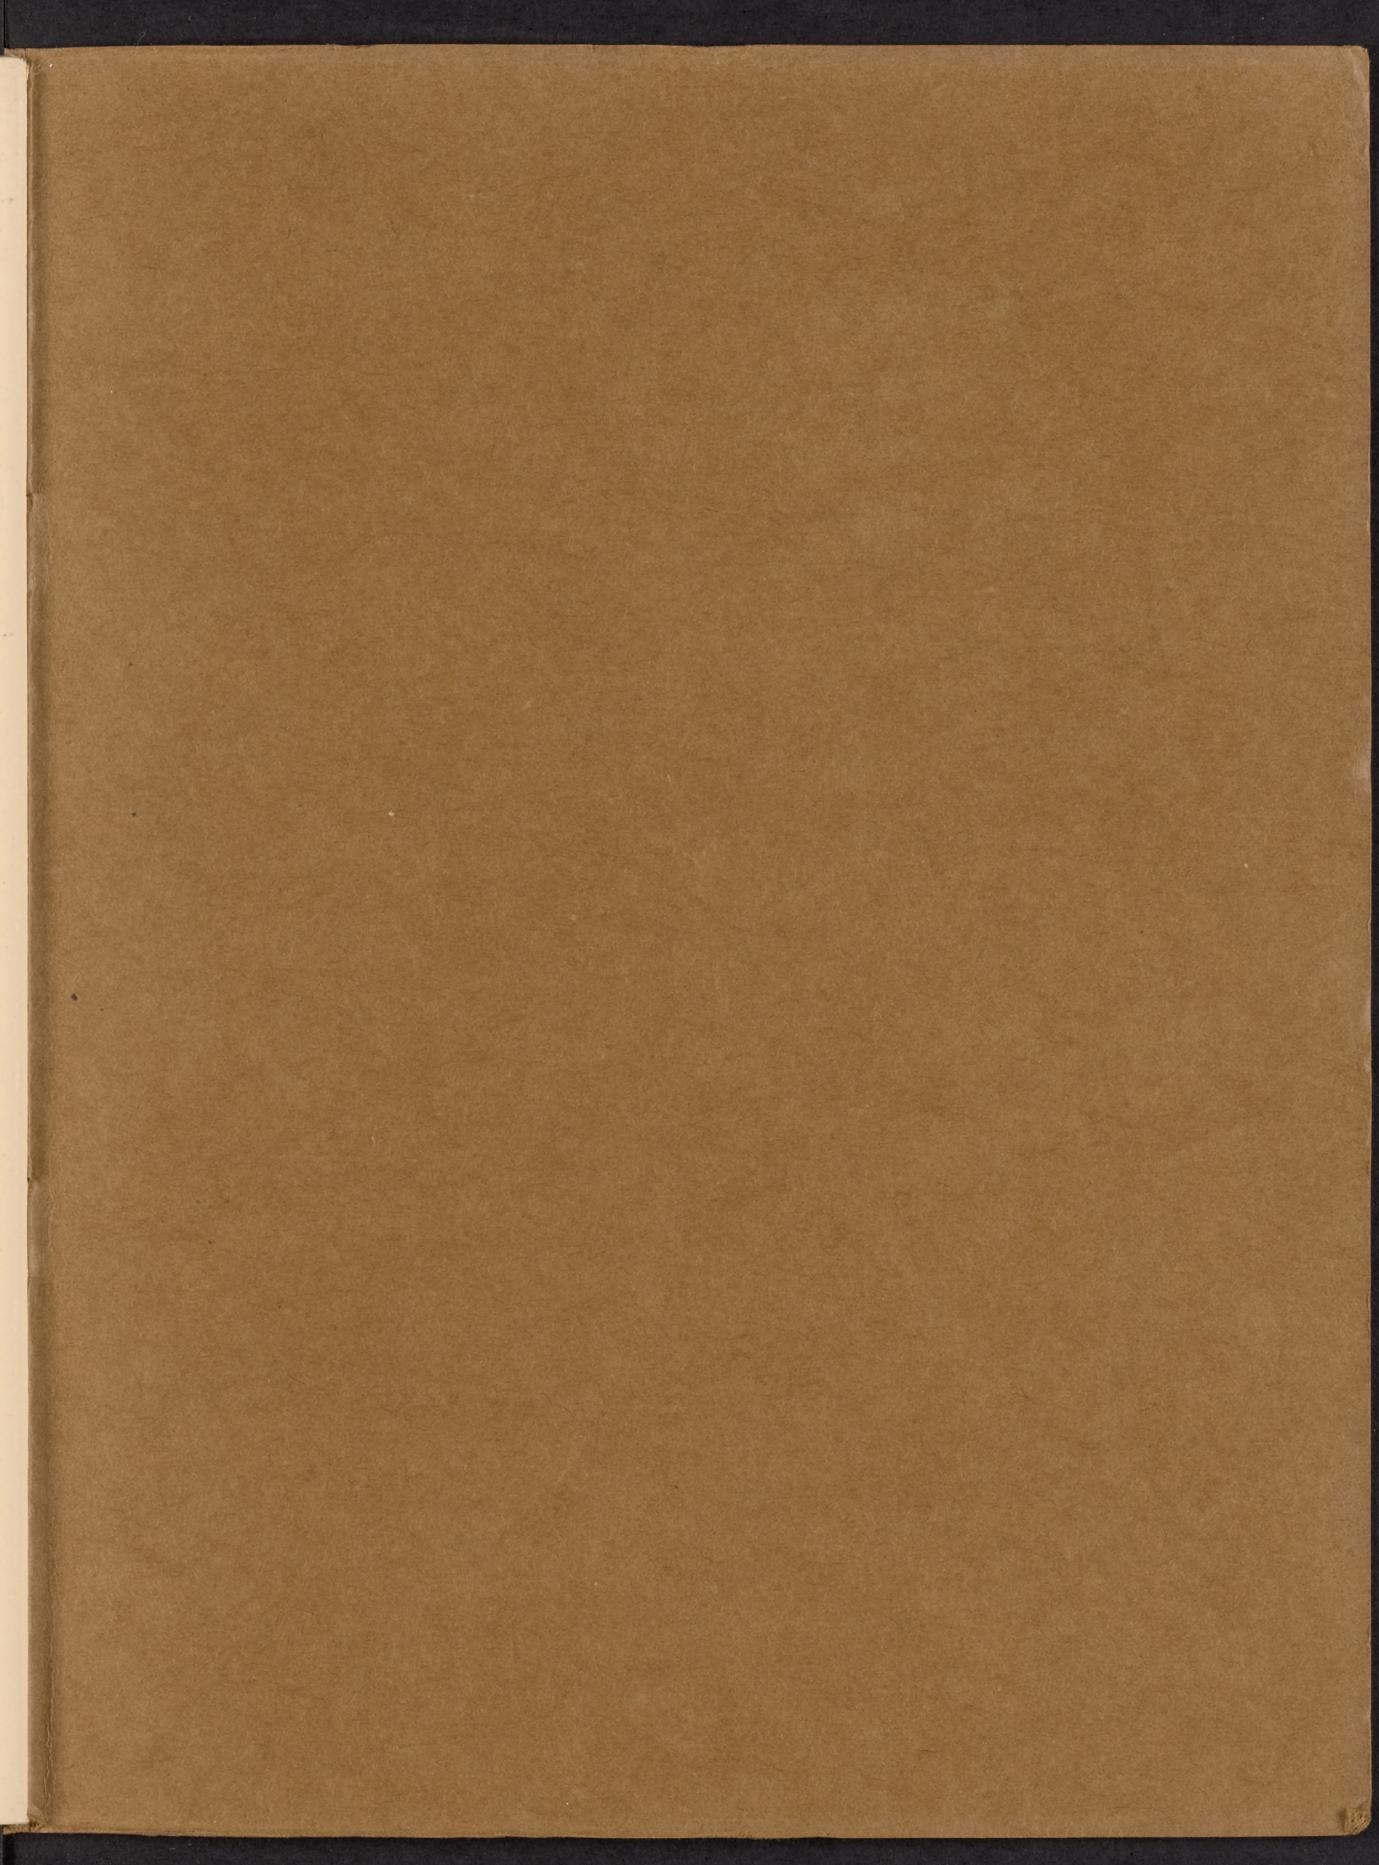

August 27, 1841—December 27, 1914

*Ordained Priest June 10, 1865;  
Consecrated Archbishop of Cabasa September 16, 1883;  
Second Archbishop of San Francisco, December 28, 1884.*

R. I. P.

In closing our report we wish to express our deep feelings of sincere gratitude and reverence towards our late beloved Archbishop, Most Reverend Patrick William Riordan. His familiar form and kindly voice will be sadly missed from St. Mary's Hospital, which he was accustomed to visit at least once each week, brightening by his presence and consoling by his sweet words of sympathy many a suffering inmate. The Sisters of Mercy owe to his advice, direction and active co-operation much that made it possible to erect the present building.

SAN FRANCISCO:  
Taylor, Nash & Taylor
